SUMMARY

Computer Science Engineering student (IoT, Cybersecurity & Blockchain) with hands-on experience building secure, full-stack web applications and cybersecurity tools. Comfortable across the stack — from Flask/MySQL backends to offensive-security testing with Burp Suite and Metasploit. Looking for an internship or entry-level role in software engineering or application security.

EDUCATION

Bachelor of Engineering — Computer Science (IoT, Cyber Security & Blockchain Technology)

East West Institute of Technology, Bengaluru | Expected Graduation: 2027 | CGPA: 7.58

Pre-University (12th): 70% | SSLC (10th): 84%

TECHNICAL SKILLS

Languages: Python, Java

Web Technologies: HTML, CSS, Bootstrap, JavaScript, Flask

Cybersecurity Tools: Burp Suite, OWASP ZAP, Nikto, Metasploit, Wireshark

Databases: MySQL

Operating Systems: Kali Linux, Ubuntu, Windows, Android

Version Control: Git, GitHub

PROJECTS

Smart Public Grievance System | HTML, CSS, Bootstrap, JavaScript, Python, MySQL

- Built a centralized, role-based web platform for citizens to register and track civic complaints, with real-time status updates and geolocation-based issue tracking.
- Designed a clean, modern interface to keep the complaint-tracking workflow intuitive for non-technical users.

Web-Based Honeypot System | Python, Flask, HTML, CSS, JavaScript, MySQL

- Developed a honeypot platform that simulates vulnerable web services to lure and study malicious traffic.
- Captured and logged SQL injection attempts, brute-force logins, and suspicious HTTP requests through a secure logging pipeline.
- Built an administrative dashboard to review captured attack data for cybersecurity analysis.

Metadata Analyzer and Cleaner | Python, Flask, HTML, CSS, Bootstrap, JavaScript

- Built a privacy-focused web app that detects and strips EXIF metadata from uploaded images.
- Enabled users to inspect hidden metadata before downloading a cleaned, privacy-safe version of their image.

AI Code Explainer and Analyzer (CodeLens AI) | React, TypeScript, FastAPI, Python, Gemini API

- Built an AI-powered web application that explains and analyzes source code across multiple programming languages.
- Enabled users to receive code summaries, detailed explanations, bug detection, security analysis, complexity analysis, and optimization suggestions to improve code quality.

ACADEMIC SECURITY LABS

Network Scanning and Analysis Using Nmap

- Performed network reconnaissance using Nmap to identify live hosts, open ports, and running services.
- Conducted TCP, UDP, and OS detection scans to assess network exposure and potential attack surfaces.
- Documented findings with risk ratings and recommended hardening measures aligned with security best practices.

Vulnerability Assessment and Penetration Testing Using OWASP ZAP

- Conducted VAPT on web applications, identifying XSS vulnerabilities, security misconfigurations, and missing security headers.
- Mapped findings to the OWASP Top 10 and assigned severity ratings with proof-of-concept documentation.
- Prepared structured VAPT reports with remediation recommendations suitable for developer handoff.

CERTIFICATIONS

Professional Certifications

- Oracle Certified Foundations Associate — Agentic AI
- Cybersecurity Defense Analyst Pathway
- Data Analytics Essentials
- Malware Analysis Introduction v1
- Career Essentials in Generative AI
- Ethics in the Age of Generative AI
- What Is Generative AI?

- AI Literacy for Everyone
- Artificial Intelligence Fundamentals
- Build Bengaluru Hackathon — Certificate of Participation
- 2-Day Java Development Workshop

Virtual Job Simulations

- Cybersecurity Analyst Job Simulation
- Cyber Security Global Virtual Internship
- Cyber Job Simulation
- AI for Sustainability Virtual Internship

Academic Certifications

- Web Programming, Web Technologies, Data Science Using Python, Advanced Java Programming, DevOps
- Entrepreneurship Awareness Program (EAP) — Central Institute of Tool Design, Hyderabad (Extension Centre, Kolar)

ACTIVITIES & LEADERSHIP

- Led a team in Viveka 2026, an inter-department hackathon.
- Coordinated task allocation and documentation across academic project teams; supported teammates with debugging, testing, and module integration.

SOFT SKILLS

Problem Solving, Team Collaboration, Communication, Leadership, Analytical Thinking, Adaptability, Time Management, Quick Learner |
Languages: English, Kannada, Hindi
